PROJECTS

Memories Full Stack [🔗](#)

- Engineered a dynamic full-stack website enabling real-time post creation and updates—leveraged front-end technologies such as React for seamless user interaction and responsiveness.
- Made with React and Node.js with MongoDB for Database. Implemented robust back-end utilizing databases and web sockets to facilitate instant content updates.
- Proficiently merged front-end and back-end through effective API integration, resulting in a smooth and interactive user experience.

Chat-App [🔗](#)

- Your own personalised chat-app. Invite your friends and start a session.
- A real-time chat application using React and Socket.io. Enabled instant messaging, real-time typing indicators, and message status tracking.
- Ensured data security through encryption and implemented a user-friendly, responsive interface. Supported multimedia sharing, notifications, and archived conversations for a comprehensive communication experience.

Test Paper Generator(Q-Gen) [🔗](#)

- Conceptualized & developed "Q-gen": an app automating "fill in the blank" quiz creation from user-input paragraphs or PDFs.
- Empower students to convert study materials into interactive quizzes, enhancing comprehension and efficiency. Facilitates educators by automating question creation from provided content, streamlining test generation.
- Seamlessly merges traditional learning with modern technology, offering innovative learning and assessment.

Unified Prescription Note [🔗](#)

- Unified Prescription Notebook is an interface between doctors and patients. It provides an infinitely scalable notebook for your prescription which only doctors can write onto.
- The aim is to make the workspace digital, get rid of unnecessary paperwork, modernize the healthcare system, and make prescriptions readily accessible
